

## Debris Guard

P/N: GRP-GP20-DG  
For Artillian GP20 Grapple

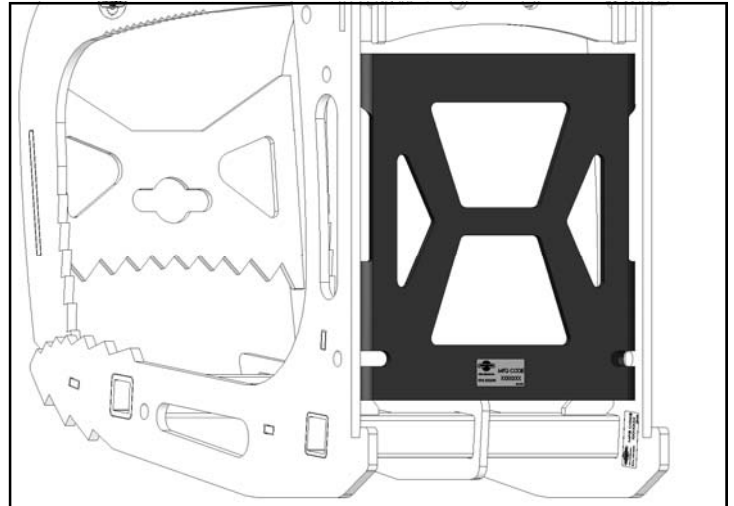

### Parts Included

- (1) Debris Guard
- (4) 1/2-13 x 1-3/4" long Bolts
- (4) 1/2-13 Lock Nuts
- (8) 1/2" Flat Washers

This product is designed to work in conjunction with Artillian Rock Bucket Sides to turn your grapple into a fully functional Rock Bucket.

1. If Rock Bucket Sides are installed, remove and discard (4) bolts to the rear of the Grapple (or Rake). Leave front Rock Bucket Side bolts installed.
2. Place Debris Guard at rear of grapple in location shown.

3. Place a washer onto a bolt. Pass bolt through one of two mounting holes in the Lower Grapple Jaw (or Rake), then through hole in Debris Guard.
4. Add a washer onto the bolt from the inside, then install a nut hand tight, as shown.
5. Repeat for all bolts.
6. Tighten all joints in alternating pattern using open-end wrenches or socket wrenches.
7. Removal is the opposite of installation.
